

The Tracking Times

As we continue to work through the Covid-19 crisis the Easy Fleet GPS team wishes you and your families the very best. Please stay healthy and stay strong.

Easy Fleet GPS is waiving late fees trough the end of 2020.

Thank you for being such loyal customers!

Easy Fleet GPS offers a driver and forward-facing camera/video solution. Please contact us at info@easyfleetgps.com for additional information.

The Easy Fleet GPS Referral Program just got better!

We are excited to announce that the Easy Fleet GPS Referral Program just got better!

In addition to earning free service for referring customers, you will receive a \$50 gift card for every customer you refer and they activate service with Easy Fleet GPS.

Simply email us the company name, contact person, contact phone number, and contact email.

We will do the rest. Please email us at

info@easyfleetgps.com.

Earn a \$20 Bill Credit!

If you are happy with the Easy Fleet GPS team and our service please feel free to leave us a Google review.

Once your review has posted we will apply a \$20 bill credit to your next statement, it's that Easy!

If you are not happy with our service, please contact me at 949 390 4837 or email me at peterf@easyfleetgps.com, so we can resolve any issues.

Keep your fleet moving. Let Easy Fleet GPS help reduce your fuel costs and overall vehicle maintenance costs.

Fuel costs and vehicle maintenance costs are two of the largest expenses for companies with a fleet.

Whether your company has a fleet of cars, light duty to heavy duty trucks, or a combination of all, vehicle maintenance and fuel costs continue to have a negative impact on a company's profit.

Easy Fleet GPS provides the tools that will allow you to manage, and more importantly reduce your fuel cost, maintenance cost, and overall wear & tear on your vehicles.

**Easy-195 4G LTE Plug & Play unit
with Check Engine light and
Engine Codes.**

The easy-195 -DTC-PNP is our most advanced plug-and-play fleet tracking device, powered by 4G LTE technology that requires virtually no installation.

It simply plugs into the vehicle’s OBDII port in seconds. The device is compatible with most cars and trucks manufactured after 1996.

It is built with advanced components and the technology needed to capture, store, and transmit the high volumes of data required for continuous and reliable fleet tracking.
