Easy Fleet GPS can aid in the recovery of a stolen work truck or piece of heavy equipment.

Over the past seven months, there has been a **26% increase** in stolen work trucks and heavy equipment.

Easy Fleet GPS has had customers who recovered their stolen work truck by using the tools we provide.

Through the use of Landmark Alerts, Afterhours Alerts, and Tow Alerts you will be notified immediately if a truck or piece of equipment moves when it should not be moving.

Please contact us for additional information.

Easy Fleet GPS can help maximize your savings and help increase your profitability.

Easy Fleet GPS offers over 25 real-time alerts and over 40 reports! You have

access to these reports and alerts 24/7 and 365 days of the year.

You will have the ability to monitor speeding, reckless driving, idling, unauthorized usage/miles, and much more.

We can help you reduce your fuel costs, vehicle maintenance costs, payroll/overtime costs, insurance costs, and prolong the life of your vehicles.

Let us help you reduce costs, increase productivity, and increase profitability.

What impact does reckless driving have on your business?

Reckless driving has such a negative impact on your business. By not monitoring speeding, harsh acceleration, harsh braking, and harsh cornering you are putting your business at risk of potential accidents and tickets.

Also, by not monitoring reckless driving your drivers can hurt your company's reputation by driving carelessly and recklessly.

You could realize an increase in vehicle maintenance costs by increased wear and tear put on the tires, brakes, shocks/struts, and engine.

By monitoring reckless driving you can ensure your drivers are driving in a safe and responsible manner, prolong the life of your vehicles, and know your company's reputation is protected.

FEATURED PRODUCT - Equipment/Asset Tracker

Do you own heavy equipment or trailers?

One of the biggest costs to a company is the theft and replacement of assets and equipment. Our Easy Fleet GPS Equipment and Asset Management solution will significantly eliminate this risk.

Whether you have yellow heavy equipment on a construction site, combine farm equipment, generators, trailers, or any valuable equipment, we offer an asset

management solution to fit your needs. With the ability to set up unlimited landmark boundaries you will be notified if a piece of equipment leaves a job site or company yard.

With our advanced tow notification, you will know if your equipment moves without having an ignition on event. In addition to reducing theft and increasing the chance of recovery, our Equipment and Asset Solution monitors engine hours, provides 10-minute updates while moving, auto sleep mode while disconnected from power, and has an internal back-up battery that will last 60 days while disconnected from power.

The telematics data provided by monitoring your equipment and assets will allow you to better manage your inventory of assets, know the utilization of your equipment and assets, and provide peace of mind knowing where every piece of equipment is located.

Our equipment and asset devices are weatherized and ruggedized to handle to demands of a construction site or any weather conditions.
