

The Tracking Times

The Easy Fleet GPS family would like to wish you and your family a very safe, healthy, and Happy Thanksgiving.

We are grateful to have such amazing and wonderful customers!

Proactively monitor your vehicle's battery voltage.

Did you know that the Easy Fleet GPS platform allows you to monitor the voltage on your vehicle's battery?

Yes, our platform allows you to monitor your vehicle's battery voltage from the mapping page, and you can also receive an immediate notification if the battery voltage drops below a certain level.

This way, you can proactively charge or replace an old battery to prevent downtime.

Please contact us if you need any assistance viewing the voltage or setting up an alert.

Vehicle	Status	Address	Voltage
Truck # 60	Stopped 23.2 hrs	6-10 Tessera Ave, Lake Forest, CA	12.2
Truck # 80	Stopped 1.1 days	Easy Fleet GPS HQ	12.4
Truck # 90	Stopped 1.8 days	Easy Fleet GPS HQ	12.4

Easy Fleet GPS helps reduce overtime costs.

Payroll costs are one of the highest costs for a company. Yet without employees, a company will not be productive.

The challenge for most companies is how to balance and manage payroll costs, overtime costs, and ensure their employees are actually working, especially when an employee works in the field.

On a regular basis, we hear from employers that they are not sure where their employees are and whether they are working or being unproductive.

Another major concern is monitoring side jobs, where the employee collects cash, yet uses the company's materials and assets to perform a personal job either during working hours or during off-hours. The company does not receive any of the revenue from these side jobs.

Invest in your Fleet.

There are two questions I get all the time from potential clients, and I love answering these questions: How much is this going to cost? Why are companies on the internet cheaper?

First, the cost is not a cost. It is an investment in your fleet, in the safety of your employees, and in your company. On average, our customers realize an 18-20% reduction in their monthly fuel costs, a 25% reduction in their vehicle maintenance costs, and a 30-35% increase in productivity.
